CORROSION

Volume 24

JANUARY 1 - DECEMBER 31

1968

CONTENTS

- Tables of Contents
- Alphabetical Subject Index
- Alphabetical Index to Authors

Table of Contents

CORROSION, Vol. 24, 1968

January

Electrochemistry of Corrosion
R. F. Steigerwald 1

Effect of Microstructure on Anodic Polarization of Carbon Steel in Sulfuric Acid
M. E. Komp and
H. E. Trout, Jr. 11

Photopotential Measurements During Corrosion of Copper in Aqueous Solutions
H. A. Arbit and Ken Nobe . . .17

Intergranular Corrosion of Nonsensitized Austenitic Stainless Steels
J. S. Armijo 24

February

Factors in Sulfide Corrosion Cracking of High Strength Steels
R. S. Treseder and
T. M. Swanson 31

Quarterly Report: Clarification of the Mechanism of the Dealloying Phenomenon
Robert Heidersbach 38

Effect of Inhibitors on Scale Removal in HCl Pickling Solutions
O. L. Riggs, Jr. and R. M. Hurd .45

Effect of Crystal Orientation on the Anodic Polarization and Passivity of Zinc
Richard F. Ashton and
Malcolm T. Hepworth 50

March

Effect of Some Environmental Conditions on Stress Corrosion Behavior of Ni-Cr-Fe Alloys in Pressurized Water
H. R. Copson and G. Economy .55

Electrochemical Properties of Ferrite and Cementite in Relation to Stress Corrosion of Mild Steels in Nitrate Solutions
J. A. S. Green and R. N. Parkins .66

Effect of pH on the Stable Passivity of Stainless Steels
H. P. Leckie 70

Stress Corrosion of Titanium Alloys In Aqueous Magnesium Chloride Solution at 154 C
G. Sanderson and J. C. Scully . .75

April

Mechanisms of Carbon Steel Decarburization and Penetration by Liquid Lithium
F. Beniere, M. Chemla,
M. Aucouturier, P. LaCombe and
C. Roques-Carmes 83

Optical Microscopy Studies of Anodic Dissolution of Iron In Sulfuric and Hydrochloric Acid Solutions
L. Felloni and G. P. Cammarota .90

Crevice Corrosion of Titanium in Aqueous Salt Solutions
John C. Griess, Jr. 96

Hydrogen-Induced Phase Transformations in Type 304L Stainless Steels
M. L. Holzworth and
M. R. Louthan, Jr. 110

Activation Energy From Carbon Steel Corrosion in Phosphoric Acid
Olen L. Riggs, Jr. 125

May

Formation and Reactivity Thermodynamics of Sodium Sulfate With Gas Turbine Alloys
M. A. DeCrescente and
N. S. Bornstein 127

Corrosion of Monel 400 in High CO_2 Well Water
Gilbert M. Ugiansky and
George A. Ellinger 134

Technical Note: Effect of Grain Size on Incubation and Propagation of Stress Corrosion Cracks in Type 302 Steel
R. J. Green and J. R. Myers . . 137

Effect of Inorganic Contaminants on the Corrosion of Metals in Chlorinated Solvents
J. J. Demo 139

June

Stress Corrosion Cracking of Alpha Titanium Alloys at Room Temperature
D. T. Powell and J. C. Scully . 151

Microelectrodes for Corrosion Studies
H. J. Cleary 159

Influence of Prepolarization on the Electrochemical Behavior of Iron-Carbon Alloy
G. C. Wood and G. C. Soltz . . 163

Discussion of the De-Alloying Phenomenon
W. B. Brooks 171

Stress Corrosion Cracking and Corrosion Behavior of Ti and Ti-Al Alloys in Methanol Iodine Solutions
A. J. Sedriks, J. A. S. Green,
and P. W. Slattery 172

Technical Note: A Technique for Identification of Microquantities of Corrosion Products on Miniaturized Electronic Components
G. L. Downs, J. D. Braun,
and V. D. Jones 178

Mechanisms of Sensitization and Stablization of Incoloy Nickel-Iron-Chromium Alloy 825
E. L. Raymond 180

July

Absorption of Hydrogen by Cathodically Protected Steel
P. E. Hudson, E. S. Snavely, Jr.,
J. S. Payne, L. D. Fiel, and
Norman Hackerman 189

Polarization Behavior of Iron Cobalt Alloys in Sulfuric Acid Solutions
M. M. Mottern and J. R. Myers . 197

The Separation of Corrosion and Stress Effects in Stress Corrosion: Ti-Al-4V in Bromine-Methanol Solutions
F. H. Cocks, J. F. Russo,
and S. B. Brummer 206

The Oxidation of Vanadium-Base Alloys by Liquid Sodium Containing Dissolved Oxides in Temperatures From 500 to 600 C
Hans U. Borgstedt
and Gunter Frees 209

Effects of Uranium on Stress Corrosion Cracking of Steels in a Nitrate Environment
R. D. McDonald 214

Some Effects of Nitrogen Content on the Stress Corrosion Susceptibility of AISI Type 304 Austenitic Stainless Steel
J. F. Eckel and T. B. Cox . . . 218

Discussion of Scale Removal in HCl
R. M. Hudson and C. J. Warning 222

August

Passivation and Acitvation of Iron in the Presence of Molybdate Ions
G. H. Cartledge 223

Oxidation of Zinc Single Crystals Under Ionic Bombardment
R. DeMaria, P. Spinedi,
and E. Susi-DeMaria 237

The Role of Surface Stress on Hydrogen Absorption by 4340 Steel
D. I. Phalen and D. A. Vaughan . 243

Passivation of Crevices During Anodic Protection
W. D. France, Jr.
and N. D. Greene, Jr. 247

The Dissolution of Zinc in the $NaNO_3$-NH_4Cl-NH_3-H_2O System
J. D. Goodrich and G. M. Schmid 252

Corrosion and Mass Transfer With Chemical Reaction—The Dissolution of Magnesium in Hydrochloric Acid
John Marangozis 255

September

Roles of Composition and Microstructure in Sulfide Cracking of Steel
E. Snape 261

Dislocation Etch Pitting Studies on Tungsten Single Crystals Under Potentiostatic Conditions
S. R. Maloof 283

Improved Data Recording for Automatic Potentiodynamic Polarization Measurements
W. D. France, Jr. and R. W. Lietz 298

Stress Corrosion Behavior of High Strength Steels
H. P. Leckie and A. W. Loginow . 291

Electrochemical Behavior of Some Nickel Base and Cobalt Base Alloys
R. B. Leonard 301

October

Techniques for Investigating Hydrogen-Induced Cracking of Steels With High Yield Strength
C. D. Kim and A. W. Loginow . 313

Intergranular Stress Corrosion Cracking of Austenitic Stainless Steels in Oxygenated High Temperature Water
J. S. Armijo 319

Role of Interstitial and Substitutional Impurities in Stress Corrosion Cracking of Low Carbon Steel in Nitrate Solution
J. Flis and J. C. Scully 326

A Technical Note: Hazards of Mercury to Metals and Alloys in the Process Industries and Some Little Known Sources of Mercury Contamination
W. B. Brooks 335

A Technical Note: Identification of the Initial Oxide Films on 18-8 Stainless Steel in High Temperature Water
T. Nakayama and Y. Oshida . . 336

Influence of Hydrogen, Oxygen, and Ammonia on the Corrosion Behavior of Plain Carbon Steel in High Temperature Water
B. E. Wilde 338

Effects of Composition on the Stress Corrosion Cracking of Ferritic Stainless
A. P. Bond and H. J. Dundas . 344

A Technical Note: Improved Working Electrode Assembly for Electrochemical Measurements
J. R. Myers, E. G. Gruenler and L. A. Smulczenski 352

November

Corrosion and Stress Corrosion Cracking of Explosively Shocked Austenitic Stainless Steels and Explosion-Bonded Stainless Steel-to-Steel Clads
L. F. Trueb 355

High Temperature Corrosion of Some Gas Turbine Alloys
R. Viswanathan 359

Technical Note: Corrosion of Steel by Iodine
D. R. Ochar and D. A. Vermilyea 368

Effects of Surface Preparation on Stress Corrosion Cracking of Type 310 Stainless Steel in Boiling 42% Magnesium Chloride
R. W. Cochran and R. W. Staehle 369

Effect of Impurities on the Defects in Oxides and Their Relationship to Oxidation of Metal
Per Kofstad 379

December

A Study of Sensitization in Types 304 and 304L Stainless Steels Using Mossbauer Spectroscopy
O. W. Albritton 389

Influence of Silicon and Manganese on Corrosion Behavior of Austenitic Stainless Steels
B. E. Wilde and J. S. Armijo . . 393

Interpretation of Passive Current Maxima During Polarization of Stainless Steels
W. D. France, Jr. and N. D. Greene, Jr. 403

Effect of Cold Working and Annealing on Oxidation Rates of Copper in Dry Air at Room Temperature
P. K. Krishnamoorthy and S. C. Sircar 407

Effect of the Polarization Technique on Dezincification Rates and the Physical Structure of Dezincified Zones
E. E. Langenegger and F. P. A. Robinson 411

Technical Note: Studies of Galvanic Corrosion Couples in Liquid Fluorine
S. M. Toy, W. D. English, and W. E. Crane 418

Observations on the Initiation of Stress Corrosion Cracking in Aluminum Alloy 7039
W. J. Helfrich 423

Technical Note: Transgranular Stress Corrosion Cracking of Mild Steels and Low Alloy Steels in the H_2-CO-CO_2 System
M. Kowaka and S. Nagata . . . 427

Discussion of Sulfide Corrosion Cracking
John H. Hoke 429

Alphabetical Subject Index

CORROSION, Vol. 24, 1968

A

ACID
Acetic solution saturated with hydrogen sulfide; effect on high strength steel, Feb 31
Chloride, pH effect on passivity of stainless steel, March 70
Electrochemical behavior of nickel base, cobalt base alloys in, Sept 301
HCl, anodic dissolution of iron, April 90
HCl, cracking of alpha titanium in, June 151
HCl, discussion of scale removal in, July 222
HCl dissolution of magnesium, Aug 255
HCl pickling solutions; effect of inhibitors on scale removal, Feb 45
Inhibitors, effect on scale removal, Feb 45
Inorganic, effect on metals, May 139
Nitric (boiling) effect on stainless steel, Nov 355
Nitric, 65% boiling, Huey test to determine sensisity of materials to intergranular attack, June 180
Nitric-dichromate solutions, effect on intergranular corrosion of nonsensitized austenitic stainless steel, Jan 24
Nitric, effect on ferrite and cementite properties, March 66
Phosphoric, activation energy from corrosion of carbon steel in, April 125
Sulfate, pH effect on passivity of stainless steel, March 70
Sulfuric, anodic dissolution of iron, April 90
Sulfuric, effect of anodic polarization in, Jan 1
Sulfuric, effect of microstructure on anodic polarization of carbon steel in, Jan 11
Sulfuric, effect on iron-0.48% carbon, June 163
Sulfuric, effect on Ni-Cr-Fe alloys, March 55
Sulfuric, effect on polarization of iron-cobalt alloys, July 197
Sulfuric, hydrogen saturated, test solution to determine passivation of crevices during anodic protection, Aug 247
Sulfuric, passive current maxima of stainless steel in, Dec 403
Trichloroethylene (boiling) effect on Hastelloy C, May 139
Acidity, effect on dezincification, Feb 38
Aerated solutions, photopotential measurements of copper in, Jan 17
Air bombardment of zinc single crystals, effect on oxidation, Aug 237
Alloying additions to prevent intergranular corrosion, Jan 24
Alloys, high purity, chemical compositions of, tabular alloys, Jan 24
ALUMINUM
Bronze, formation of self-healing protective films, Feb 38
Liquid fluorine effect on, Dec 418
Stress corrosion cracking of Alloy 7039, Dec 423
Titanium–, corrosion behavior in methanol iodine solutions, June 172
Ammonia, influence on corrosion of carbon steel in high temperature water, Oct 338
Annealing effects on copper, Dec 407
Anodic dissolution kinetics of carbon steel, Oct 338
Anodic dissolution kinetics of stainless steel, Dec 393
Anodic dissolution of iron in H_2SO_4 and HCl, April 90
ANODIC POLARIZATION
Automatic potentiodynamic polarization measurements, Sept 298
Control of corrosion reactions, Jan 1
Crystal orientation effect on passivity of zinc, Feb 50
Curves for carbon steel in sulfuric acid, Jan 11
Curves for nickel base, cobalt base alloys in various media, Sept 301
Effect of microstructure of steel in sulfuric acid, Jan 11
Effect on dezincification, Dec 411
Electrochemical techniques used to study corrosion of carbon steel, Oct 338
Impurity effects on corrosion behavior of stainless steel, Dec 393
Iron-cobalt alloys in sulfuric acid, July 197
Low current densities produce intergranular corrosion in alpha titanium, June 151
Molybdate ion passivation of iron, Aug 223
Passivation of crevices, Aug 247
Passive current maxmia of stainless steels, Dec 403
pH effect on passivity of stainless steel, March 70
Pitting studies of tungsten single crystals under potentiostatic conditions, Sept 283
Studies of stress corrosion of mild steel in nitrate solutions, March 66
Ti and Ti-Al alloys in methanol iodine solutions, June 172
Working-electrode assembly of electrochemical measurements, Oct 352
Armco iron, decarburization by liquid lithium, April 83
Arsenic, effect on dezincification, Feb 38
Arsenic, effect on hydrogen absorption by cathodically protected steel, July 189
Automatic potentiodynamic polarization measurements, Sept 298

B

Brass, dezincification of, Feb 38
Brasses, dezincification of, Dec 411
Bromine-methanol solution, effect on stress corrosion of Ti-6Al-4V alloy, July 206

C

Calcium effect in liquid sodium on vanodium-base alloys, July 209
Carbide stabilizers, effect on Alloy 600 in pressurized water, March 55
CARBON DIOXIDE
Monel corrosion in high CO_2 well water, May 134
Carbon-doped stainless steel alloys, intergranular corrosion of, Jan 24
Cathodic charging, effect on 304L stainless steel, April 110
Cathodic dissolution kinetics of stainless steel, Dec 393
CATHODIC POLARIZATION
Carbon steel in hydrogenated and ammoniated water at 289 C, Oct 338
Curves for iron-cobalt alloy in sulfuric acid, July 197
Mild steel in nitrate solutions, March 66
Preventive for cracking of alpha titanium in 3% NaCl solution, June 151
Cathodic reaction accompanying dissolution of zinc, Aug 252
Cathodic reactions of Ti and Ti-Al alloys in methanol iodine solutions, June 172
Cathodic Tafel polarization data on carbon steel, Oct 338
Cathodic Tafel polarization experiments conducted on silicon alloys in H_2SO_4, Dec 393
Cationic vacancies of oxide films on copper, Dec 407
Cementite, electrochemical properties, March 66
Cementite precipitate, influence on decarburizing of carbon steel by liquid lithium, April 83
Chemical process industry, effect of mercury on metals, Oct 335
CHLORIDES
Contaminated atmospheres, effect on gas turbine alloys, Nov 359
Effects on dezincification, Feb 38
Etch pitting studies of tungsten in, Sept 283
Ion, effect on titanium corrosion, April 96
Magnesium, stress corrosion of titanium in, March 75
Solutions, effect on stainless steel, March 70
Chlorinated solvents, effect of inorganic contaminants on corrosion of metals in, May 139
CHROMIUM
Addition to steel; performance in sulfide environments, Feb 31

Content in binary alloys for resistance to high temperatures, Nov 359
Content in steel, effect on sulfide cracking, Sept 261
Iron-nickel Alloy 825, mechanisms of sensitization and stablization, June 180
Cleavage cracking of alpha titanium, June 151
Cobalt base, nickel base alloys, electrochemical behavior, Sept 301
Cobalt base superalloys, accelerated oxidation of, in salt atmospheres, May 127
Cobalt-iron alloy polarization in H_2SO_4 solutions, July 197
COPPER
Additions decrease dissolution of alloys in reducing media, Sept 301
Cold working and anneal effects on oxidation rates of, Dec 407
Dezincification of, Dec 411
Ion concentration, effect on dezincification, Feb 38
Liquid fluorine effects on, Dec 418
Photopotential measurements in aqueous solutions, Jan 17
Redeposition, from dissolved brass, Feb 38
Corrosion products, identification of microquantities on miniaturized electronic components, June 178
Crevice corrosion of titanium in non-oxidizing acid solutions, April 96
Crevice passivation during anodic protection, Aug 247
Crevices–not necessary to initiate cracking of sensitized stainless steels, Oct 319
Crystal orientation effect on anodic polarization of passivity of zinc, Feb 50
Cupro-nickel, mechanism of de-alloying, June 171

D

De-alloying, description, Feb 38
De-alloying phenomenon, a discussion, June 171
De-aluminization of aluminum bronzes, Feb 38
Decarburization of steel in sulfuric acid, Jan 11
Decarburizing effect of liquid lithium on carbon steel, April 83
Descaling in HCl pickling solutions; effect of acid inhibitors, Feb 45
Dezincification, a discussion, June 171
Dezincification, description, Feb 38
Dezincification, effect of polarization technique on, Dec 411
Dezincification, mechanism of, May 134
Dezincification of Monel in high CO_2 well water, May 134
Dezincification, plug type attack, Feb 38
Dezincified zones, physical structure, Dec 411
Diffusion, effect on electrochemical reactions, Jan 1
Dislocation etch pitting of tungsten single crystals under potentiostatic conditions, Sept 283
Ductile fracture of alpha titanium alloys at room temperature, June 151

E

Electrochemical behavior of anodically protected metals, Aug 247
Electrochemical behavior of high purity stainless steel, Dec 393
Electrochemical behavior of iron-carbon alloys, influence of prepolarization, June 163
Electrochemical behavior of some nickel base, cobalt base alloy, Sept 301
Electrochemical effects on dezincification, Feb 38
Electrochemical polarization data; description of a working-electrode assembly, Oct 352
Electrochemical polarization measurements to determine pH effects on passivity of stainless steel, March 70
Electrochemical polarization techniques used to study corrosion of carbon steel, Oct 338
Electrochemical properties of ferrite and cementite, March 66
Electrochemical studies of titanium crevice corrosion in salt solutions, April 96
Electrochemical techniques to analyze corrosion reactions, Jan 1
Electrochemical technique to measure hydrogen permeability, Oct 313
Electrochemistry of corrosion, Jan 1
Electrochemistry of hydrogen absorption by cathodically protected steel, July 189
Electrode potential of Ti and Ti-Al alloys in methanol iodine solutions, June 172
Electrode reactions in corrosion processes, Jan 1
Electrolyte contamination, Oct 352
Electron diffractogram, corundum structure identified on 18-8 stainless steel, Oct 336
Electron microscope identifies corrosion products on electronic components, June 178
Electronic components, identification of corrosion products, June 178
Embrittlement, hydrogen, of 304L stainless steel, April 110
Embrittlement of steel in the H_2O-CO-CO_2 system, Dec 427
Embrittlement of vanadium base alloys in liquid sodium, July 209
Ep-time curves, definition, June 163
Explosion-bonded stainless steel-to-steel clads, stress corrosion of, Nov 355
Explosively shocked austenitic stainless steel, stress corrosion of, Nov 355

F

Ferrite, electrochemical properties, March 66
Ferrous ions effect on molybdate ion passivation of iron, Aug 223
Film, oxide, identification on 18-8 stainless steel, Oct 336
Fissurization of carbon steel exposed to liquid lithium, April 83
Fluorine, liquid, Galvanic corrosion in, Dec 418

G

Galvanic corrosion in liquid fluorine, Dec 418
Galvanic reactions, sacrifical, graphed data, Jan 1
Galvanostatic polarization of Ti and Ti-Al alloys in methanol iodine solutions, June 172
Gas turbine alloys, accelerated oxidation of, May 127
Gas turbine alloys, high temperature corrosion of, Nov 359

H

Hastelloy Alloys B, C, D, F, and G, electrochemical behavior, Sept 301
Hastelloy C, effect of inorganic contaminants in chlorinated solvents, May 139
Haynes Alloy No. 25, electrochemical behavior, Sept 301
Haynes Stellite Alloy No. 6B, electrochemical behavior, Sept 301
Heat treatment, effect on de-aluminization of aluminum bronzes, Feb 38
Heat treatment, effect on microstructure, Jan 11
Heat treatment effects on stress corrosion of ferritic stainless steel, Oct 344
Heat treatment effects on stress corrosion of low carbon steel in nitrate solutions, Oct 326
Heat treatment effects on sulfide cracking of steel, Sept 261
Holidays in coatings, effect on hydrogen absorption of cathodically protected steel, July 189
Hot corrosion test furnace, description, Nov 359
HYDROGEN
Absorption by cathodically protected steel, July 189
Absorption by 4340 Steel, Aug 243
Cracking of high yield strength steels; techniques for determining hydrogen up take and permeability, Oct 313
Effect on corrosion of Ni-Cr-Fe alloy in pressurized water, March 55
Effect on titanium corrosion in salt solutions, April 96
Embrittlement in the H_2O-CO-CO_2 system, Dec 427
Embrittlement of high strength steel, Sept 291
Embrittlement of 304L stainless steel, April 110
Induced phase transformations in 304L stainless steel, April 110
Influence on corrosion of carbon steel in high temperature water, Oct 338
Ions, effect in corrosion reactions, Jan 1
Penetration in steel, July 189
Poisoning, effect on electrochemical behavior of iron-carbon alloys, June 163
Sulfide corrosion cracking, a discussion, Dec 429
Sulfide cracking of steel, Sept 261
Sulfide, techniques to determine cracking of high yield strength steel, Oct 313
Uptake by metal measured by vacuum extraction method, Oct 313
Hydrospace application of high strength steels, stress corrosion behavior, Sept 291
Huey test, measure of sensitivity of Incoloy 825 to intergranular attack, June 180

I

Inert gas ionic bombardment of zinc single crystals, Aug 237
INHIBITORS
Amine, high molecular weight; for HCl pickling solutions, Feb 45
Amine, nitro, this, and epoxide control corrosion of metals in chlorinated solutions, May 139
Antimony, effective to reduce dezincification, Feb 38

Aromatic amine quaternaries of polychloro methylated n-Alkylene 500; for HCl pickling solutions, Feb 45
Arsenic, effective to reduce dezincification processes, Feb 38
Effect of, scale removal in HCl pickling solutions, Feb 45
Molybdate ion, passivation of iron, Aug 223
Nonpassivating; anodic and cathodic reaction, graphed data, Jan 1
Passivating, electrochemistry of, Jan 1
Phosphorous, effective to reduce dezincification, Feb 38
Scale removal in HCl, a discussion, July 222
XO_4^{n-}, mechanism in anodic passivation of iron, Aug 223
Inorganic contaminants, effect on corrosion of metals in chlorinated solvents, May 139
Instrumentation for potentiodynamic polarization measurements, Sept 298
Intergranular attack, sensitivity of Incoloy 825, June 180
Intergranular corrosion of nonsensitized austenitic stainless steels, Jan 24
Intergranular corrosion of titanium in $MgCl_2$, March 75
Intergranular corrosion of Types 304 and 310 stainless steel, Nov 355
Intergranular corrosion susceptibility of stainless steels, Dec 403
Intergranular cracking of carbon steel by liquid lithium, April 83
Intergranular stress corrosion of stainless steel in oxygenated high temperature water, Oct 319
Interstitional impurities, role in stress corrosion of low carbon steel in nitrate solution, Oct 326
Iodine, effect on steel, Nov 368
Iodine, methanol solutions, effect on titanium, June 172
Ionic bombardment of zinc single crystals, Aug 237

K

Kinetics aspects of corrosion processes, Jan 1
Kinetics of lithium flux; decarburizing of carbon steel, April 83
Kinetics of stressed, high strength steel with cathodically generated hydrogen, Aug 243

L

Linear polarization of metals, Jan 1
Lithium, decarburizing of carbon steel, April 83
Lithium hydroxide, performance of Ni-Cr-Fe alloys in, March 55
Logarithmic converter, description, Sept 298

M

Magnesium chloride solution, stress corrosion of titanium in, March 75
Magnesium chloride (boiling), test solution to determine stress corrosion susceptibility of Type 304 stainless steel, July 218
Magnesium chloride (boiling), test solution to study effect of grain size on stress corrosion cracking of Type 302 stainless steel, May 137
Magnesium chloride, test solution to determine effect of surface preparation on cracking of Type 310 stainless steel, Nov 369
Magnesium chloride, test solution used to determine stress corrosion of ferritic stainless steel, Oct 344
Magnesium dissolution in HCl, Aug 255
Manganese additions to high purity 14% Cr-14% Ni-bal Fe alloy; intergranular corrosion of, Jan 24
Manganese influence on high purity stainless steel, Dec 393
Mass transfer used to predict uniform corrosion rates, Aug 255
MECHANISM
Anodic dissolution of iron in H_2SO_4 and HCl, April 90
Corrosion product identification on electronic components, June 178
Crevice attack on titanium in salt solutions, April 96
De-alloying, a discussion, June 171
De-alloying phenomenon, Feb 38
De-aluminization, Feb 38
Decarburizing of carbon steel by liquid lithium, April 83
Electrochemistry of corrosion, Jan 1
Hydrogen effects on 304L stainless steel, April 110
Interstital and substitutional impurities, role in cracking of low carbon steel, Oct 326
Intergranular corrosion of nonsensitized austenitic stainless steel, Jan 24
Intergranular corrosion of nonsensitized stainless steel, March 55
Intergranular stress corrosion of titanium in $MgCl_2$, March 75
Iodine effects on steel, Nov 368
Ionic bombardment of metal surfaces, Aug 237
Magnesium dissolution in HCl, Aug 255
Mass transfer, Aug 255
Metric system for reporting corrosion data, Sept 308
Microelectrodes for corrosion studies, June 159
Passive current maxima during anodic polarization of stainless steel, Dec 403
Pitting of tungsten under potentiostatic conditions, Sept 283
Role of surface stress on hydrogen absorption of 4340 steel, Aug 243
Sensitization and stablization of Incoloy 825, June 180
Sensitization of stainless steel at high temperature, Dec 389
Stress corrosion cracking of austenitic stainless steels, Nov 355
Stress corrosion of Type 302 stainless in $MgCl_2$, May 137
Sulfidation, accelerated oxidation of cobalt and nickel base superalloys, April 127
Sulfide cracking of high strength steel, Feb 31
Membrane experiments to determine hydrogen absorption by cathodically protected steel, July 189
Mercury, hazardous to metals, Oct 335
Mercury, little known sources of contamination, Oct 335
Methanol-bromine solutions, effect on stress corrosion of Ti-6Al-4V alloy, July 206
Methylene chloride, effect on corrosion of metals, May 139
Metric system for reporting corrosion data, Sept 308
Microelectrodes for corrosion studies, June 159
Microelectrodes, how to construct them for corrosion studies, June 159
Microscopy, optical, studies of anodic dissolution of iron in H_2SO_4 and HCl, April 90
Microstructure importance in sulfide cracking of steel, Sept 261
Microstructure, its effect on anodic polarization of carbon steel in sulfuric acid, Jan 11
Mill scale removal in HCl, a discussion, July 222
Molybdate ion, passivation of iron in presence of, Aug 223
Molybdenum addition improves titanium corrosion resistance in nonoxidizing acid solutions, April 96
Molybdenum addition to stainless steel; stress corrosion performance, Oct 334
Monel, corrosion of in high CO_2 well water, May 134
Monochromatic illumination, technique for determining photogalvanic potentials, Jan 17
Masbauer spectoscopy to determine sensitization in stainless steel, Dec 389

N

NICKEL
Addition improves titanium corrosion resistance in nonoxidizing acid solutions, April 96
Base, cobalt base alloys, electrochemical behavior, Sept 301
Cobalt base superalloy, accelerated oxidation of, May 127
Cr-Fe-Ni alloys in pressurized water, March 55
Cupro-, mechanism of de-alloying, June 171
Dezincification of Monel in high CO_2 water, May 134
Effect on passive current maxima during anodic polarization of stainless steel, Dec 403
Incoloy 825, mechanisms of sensitization and stablization, June 180
Liquid fluorine effects on, Dec 418
Low alloy steels; effect of nickel content in sulfide environments, Feb 31
Maraging, 12Ni and 18Ni, steels, stress corrosion data, Sept 291
Monel corrosion in high CO_2 well water, May 134
Ni-base alloys, performance in sulfur bearing gases, Nov 359
Nitrate, boiling, test solution to determine effects of uranium on SCC of steels, July 214
Nitrate solution, effect on low carbon steel, Oct 326
Nitrate solution, effect on stress corrosion of mild steels, March 66
Nitrate solution, etch pitting studies in, Sept 283
Nitrogen additions to high purity alloys; intergranular corrosion of, Jan 24
Nitrogen effects on stress corrosion of Type 304 stainless steel, July 218
Noncathodic action of molybdate ion, Aug 223

O

Oil refinery streams, source for mercury, Oct 335

Optical microscopy of stress corrosion in aluminum Alloy 7039, Dec 423
Optical microscopy studies of anodic dissolution of iron in H_2SO_4 and HCl solutions, April 90
Organic fluids, effect on corrosion of steel, Nov 368
Oxidation of vanadium-base alloys by liquid sodium, July 209
Oxidation, process in corrosion reactions, Jan 1
Oxide film growth on copper, Dec 407
Oxide films, identification on 18-8 stainless steel in high temperature water, Oct 336
Oxide impurities, effect on oxidation of metals, Nov 379
Oxides, defect structure of Nb_2O_5, Nov 379
Oxides, defect structure of Ta_2O_5, Nov 379
Oxides, defect structure of ZrO_2, Nov 379
Oxides, relationship to oxidation of metal, Nov 379
OXYGEN
Additions to high purity alloys; intergranular corrosion of, Jan 24
Adsorption on copper, Dec 407
Defect structures in O_2-deficient oxides, Nov 379
Effect of concentration on cathodic polarization of titanium in 1 M NaCl, April 96
Effects on dezincification, Feb 38
Effects on hydrogen absorption by cathodically protected steel, July 189
Effects on oxidation of zinc single crystals under ionic bombardment, Aug 237
Effects on passivation of iron in molybdate ion inhibitor, Aug 223
Effects on performance of Ni-Cr-Fe alloys in pressurized water, March 55
Effects on vanadium-base alloys in liquid sodium, July 209
Evolution from iron-cobalt alloys in sulfuric acid, July 197
Influence on corrosion of carbon steel in high temperature water, Oct 338
Influence on oxide film growth on copper, Dec 407
Oxygenated high temperature water, effect on stress corrosion of stainless steel, Oct 319
Role in corrosion of metals, Jan 1
Oxygenated water, effect on stainless steel, Oct 319

P

Palladium addition improves corrosion resistance of titanium in nonoxidizing acid solutions, April 96
Passivation and activation of iron in presence of molybdate ion, Aug 223
Passivation of crevices during anodic protection, Aug 247
Passive current maxmia during anodic polarization of stainless steels, Dec 403
Passivity, effect on corrosion processes, Jan 1
Passivity of iron-cobalt alloys in sulfuric acid, July 197
pH effect on anodic dissolution of iron in H_2SO_4 and HCl, April 90
pH effect on hydrogen absorption by cathodically protected steel, July 189
pH effect on Ni-Cr-Fe alloy in pressurized water, March 55
pH effect on the stable passivity of stainless steel, March 70
Phase transformation in 304L stainless steel, April 110
Phosphoric acid, activation energy from carbon steel corrosion in, April 125
Phosphorus additions to high purity alloys; intergranular corrosion of, Jan 24
Phosphorus content in steel, effect on sulfide cracking, Sept 261
Phosphorus, effect on hydrogen absorption of cathodically protected steel, July 189
Photopotential measurements of copper in aqueous solutions, Jan 17
Pipeline, hydrogen absorption by cathodically protected steel, July 189
Pitting in liquid fluorine, Dec 418
Pitting of tungsten single crystals under potentiostatic comditions, Sept 283
Plastic deformation by cold rolling; alloy performance in sulfide environments, Feb 31
Plastic deformation of copper, Dec 407
Polarization measurements, graphed data, Jan 1
Polarization studies of ferrite and cementite, March 66
Potentiodynamic polarization measurements (automatic), Sept 298
Potentiostatic polarization measurements of zinc, Feb 50
Potentiostatic polarization of Ti and Ti-Al alloys in methanol iodine solutions, June 172
Precorrosion susceptibility index, definition, July 206
Preferential corrosion of low carbon steel, Oct 326

R

Reactivity thermodynamics of sodium sulfate with gas turbine alloys, May 127
Reduction, process in corrosion reactions, Jan 1
Refractory metal, oxidation in liquid sodium, July 209

S

Salt effects on nickel and cobalt base alloys, May 127
Salt, effects on titanium, April 96
Scanning potentiostat, description, Sept 298
Sea water, solution used to determine stress corrosion behavior of high strength steel, Sept 291
Sensitization in Types 304 and 304L stainless steels, Dec 389
Short transverse stress corrosion cracking of 7039-T64, Dec 423
Silicon additions to high purity alloys; intergranular corrosion of, Jan 24
Silicon influence on high purity stainless steels, Dec 393
Silver, liquid fluorine effects on, Dec 418
Single crystal copper, photopotential measurements, Jan 17
SODIUM CHLORIDE
Accelerated oxidation of cobalt and nickel base alloy in atmospheres of, May 127
Effect on alpha titanium, June 151
Photopotential measurements during corrosion of copper in, Jan 17
Solution, effect on titanium, April 96
Test solution to determine stress corrosion behavior of high strength steels, Sept 291
Sodium fluoride, photopotential measurements of copper single crystal in, Jan 17
Sodium halide solutions, photopotential measurements during corrosion of copper in, Jan 17
Sodium hydroxide, test solution for determining crystal orientation effect on anodic polarization of zinc, Feb 50
Sodium, liquid, effect on vanadium-base alloys, July 209
Spectroscopy to determine sensitization in stainless steel, Dec 389
Spheroidite, effect of sulfuric acid on, Jan 11
Stainless steel, nonsensitized austenitic, intergranular corrosion of, Jan 24
STEEL
Alloy 600 as a material for heat exchanger tubing, March 55
Austenitic stainless, effect of grain size and propagation of cracking in Type 302, May 137
Austenitic stainless, stress corrosion in oxygenated high temperature water, Oct 319
Carbon, activation energy from steel corrosion in phosphoric acid, April 125
Carbon, decarburizing effect of liquid lithium, April 83
Carbon, effect of microstructure on anodic polarization of carbon steel in sulfuric acid, Jan 11
Carbon, photomicrographs of microstructure in sulfuric acid, Jan 11
Carbon, sulfide cracking of, Sept 261
Cathodically protected, hydrogen absorption, July 189
CF-8 stainless, passivation of crevices, Aug 247
Effect on mercury on, Oct 335
Electrochemistry of corrosion, Jan 1
Ferritic stainless, stress corrosion cracking of, Oct 344
High strength, stress corrosion behavior, Sept 291
High strength, sulfide cracking, Feb 31
Hypoeutectoid ferrite network, mechanism of decarburization of carbon steel by liquid lithium, April 83
Incoloy 825, electron photomicrographs showing corrosion behavior, June 180
Incoloy 800, stress corrosion tests in oxygenated water, Oct 319
Incoloy 825, mechanisms of sensitization and stablization, June 180
Incoloy, performance in pressurized water, March 55
Inconel Alloy X-750, sensitivity measurements, June 180
Inconel, performance in pressurized water, March 55
Iodine effects on, Nov 368
Inorganic contaminant effects in chlorinated solvents, May 139
Kinetics of lithium penetration into fissurized wall, April 83
Liquid fluorine effects on, Dec 418
Low alloy, sulfide cracking of, Sept 261
Low carbon, role of interstitial and substitional impurities in stress corrosion, Oct 326

Low chromium alloys, electrochemical behavior, Sept 301
Metric system for reporting corrosion data, Sept 308
Microelectrodes for corrosion studies, June 159
Mild, stress corrosion in nitrate solutions, March 66
Mill scale removal in HCl, a discussion, July 222
Mill scale, removal in HCl pickling solutions, Feb 45
Monel, corrosion of, in high CO_2 well water, May 134
Optical microscopy of anodic dissolution of iron, April 90
pH effects in sulfide environments, Feb 31
Stainless, 18-8, identification of oxide films, Oct 336
Stainless, austenitic, stress corrosion cracking of, Nov 355
Stainless, effect of pH on stable passivity of, March 70
Stainless, high purity, influence of silicon and manganese, Dec 393
Stainless, hydrogen-induced phase transformations, April 110
Stainless, influence of impurities on corrosion behavior of stainless steel, Dec 393
Stainless, liquid fluorine effects on, Dec 418
Stainless, nonsensitized austenitic, intergranular corrosion of, Jan 24
Stainless, passive current maxmia of, Dec 403
Stainless, sensitization studies using Mossbauer spectroscopy, Dec 389
Stainless, Type 304, effect of nitrogen content on stress corrosion, July 218
Stainless, Type 304, exposed to boiling methylene chloride and 1, 1, 2 trichloroethane, May 139
Stress corrosion cracking in H_2O-CO-CO_2, Dec 427
Sulfide corrosion cracking, a discussion, Dec 429
Superalloys, accelerated oxidation of, in oxidizing environments, May 127
Surface stress effects on hydrogen absorption of 4340, Aug 243
Sulfide cracking, roles of composition and structure, Sept 261
Techniques for determining hydrogen induced cracking, Oct 313
Temperature effects on sensitivity and stablization of Incoloy 825, June 180
Type 304, passivation of crevices, Aug 247
Type 310 stainless, effect of surface preparation on stress corrosion, Nov 369
Uranium addition to, for exposure to nitrate environments, July 214

STRESS CORROSION

Alpha titanium alloys at room temperature, June 151
Cracking in Aluminum Alloy 7039, Dec 423
Cracking of ferritic stainless steels, Oct 344
Cracking of mild and low alloy steels in H_2O-CO-CO_2, Dec 427
Explosively shocked austenitic stainless steel and explosion bonded stainless steel-to-steel clads, Nov 355
Grain size effect on incubation and propagation of cracking in Type 302 steel, May 137
High strength steels, Sept 291
Intergranular attack of austenitic stainless steels in oxygenated high temperature water, Oct 319
Intergranular cracking of Type 304 stainless steel, July 218
Metals exposed to chlorinated solvents, May 139
Mild steel in nitrate solutions, March 66
Ni-Cr-Fe alloys in pressurized water, March 55
Nitrogen effects on Type 304 stainless steel, July 218
Role of interstitial and substitional impurities in cracking of low carbon steel in nitrate solution, Oct 326
Separation of corrosion and stress effects in stress corrosion: Ti-6Al-4V in bromine-methanol solutions, July 206
Surface preparation, effect on Type 310 in boiling 42% magnesium chloride, Nov 369
Ti-6Al-4V alloy in Bromine-Methanol solutions, July 206
Titanium magnesium chloride, March 75
Titanium in methanol iodine solutions, June 172
Type 302 in boiling $MgCl_2$, May 137
Uranium effects on stress corrosion cracking of steels in boiling nitrate, July 214
Stress-sorption theory, July 214
Substitional impurities, role in stress corrosion of low carbon steel in nitrate solution, Oct 326
Sulfate solutions, effect on stainless steel, March 70
Sulfidation of gas turbine alloys, Nov 359
Sulfidation of nickel and cobalt base alloys, May 127
Sulfide corrosion cracking, a discussion, Dec 429
Sulfide cracking of high strength steels, Feb 31
Sulfide cracking of medium strength steel, discussion, Feb 31
Sulfide cracking of steel, roles of composition and microstructure, Sept 261
Sulfide, effect on hydrogen absorption by cathodically protected steel, July 189
Sulfide, hydrogen, concentration in "sour" oil wells, Feb 31
Sulfide ores, source for mercury contamination, Oct 335

SULFUR

Additions to high purity alloys; intergranular corrosion of, Jan 24
Contaminated fuels, effect on gas turbine alloys, Nov 359
Content in steel, effect on sulfide cracking, Sept 261
Effect on hydrogen absorption of cathodically protected steel, July 189
Reaction with NaCl to accelerate oxidation of gas turbine alloys, May 127
Surface preparation, effect on stress corrosion cracking of Type 310 in boiling 42% magnesium chloride, Nov 369

T

Tafel equation, determining polarization of zinc in aqueous alkaline solutions, Feb 50
Tantalum, oxidation of, Nov 379

TEMPERATURE, HIGH

Corrosion of some gas turbine alloys, Nov 359
Effect on hydrogen absorption by 4340 steel, Aug 243
Effect on oxidation of zinc single crystals under ionic bombardment, Aug 237
Effect on pitting of tungsten single crystals under anodic protection, Sept 283
Hot corrosion test furnace, description, Nov 359
Oxidation of vanadium-base alloys, July 209
Sensitization of stainless steel at, Dec 389
Water, identification of oxide films on 18-8 stainless steel, Oct 336

Thermodynamic aspects of corrosion, Jan 1
TTS diagram, time-temperature-sensitization of Incoloy 825, June 180
TTT diagram, time-temperature-transformation, for $M_{23}C_6$ in Inconel Alloy X-750, June 180

TITANIUM

Alloying, effect on titanium corrosion resistance in salt solutions, April 96
Cathodic polarization curves in 1 M NaCl, April 96
Crevice corrosion in aqueous salt solutions, April 96
Electron micrographs of alpha titanium affected by 3% NaCl and MeOH/HCl, June 151
Intergranular stress corrosion in $MgCl_2$, March 75
Stress corrosion in magnesium chloride solution, March 75
Stress corrosion in methanol iodine solutions, June 172
Stress corrosion of alpha alloys at room temperature, June 151
Stress effects in Bromine-methanol solutions, July 206
Temperature effects on anodic polarization of, April 96
Transgranular cracking in $MgCl_2$, March 75
Transgranular stress corrosion in 3% NaCl solution, June 151
Transgranular corrosion of low carbon steel in nitrate solution, Oct 326
Transgranular cracking of titanium in $MgCl_2$, March 75
Transgranular cracking of Type 304 stainless steel in boiling magnesium chloride, July 218
Transgranular stress corrosion of alpha titanium at room temperature, June 151
Transgranular stress corrosion of ferritic stainless steel, Oct 344
Transgranular stress corrosion of mild steel in H_2O-CO-CO_2, Dec 427
Trichloroethane (1, 1, 2-), effect on corrosion of metals, May 139
Tubing, head exchanger, performance in pressurized water, March 55
Tungsten, pitting studies of single crystals under potentiostatic conditions, Sept 283

Turbine alloys, accelerated oxidation of, May 127

U

Udimet-700, performance in sulfur bearing gases, Nov 359
Uranium effects on stress corrosion cracking of steels in boiling nitrate July 214

V

Vanadium-base alloys, oxidation by liquid sodium, July 209

W

WATER
High temperature; formation of oxide film on 18-8 stainless steel, Oct 336
High temperature; influence of oxygen, hydrogen, and ammonia on corrosion of carbon steel, Oct 338
Hydrogenated, effect on Ni-Cr-Fe alloys, March 55
Oxygenated, effect on carbon steel, Oct 338
Oxygenated, high temperature, stress corrosion effects on stainless steel, Oct 319
Pressurized, performance of Ni-Cr-Fe alloys in, March 55
Weldments, Inconel 600, behavior in pressurized water, March 55
Working-electrode assembly for electrochemical measurements, Oct 352

X

X-ray diffraction studies on corrosion of carbon steel, Oct 338
X-ray diffraction to determine sensitization in stainless steels, Dec 389

Z

ZINC
Crystal orientation effect on polarization and passivity, Feb 50
Dissolution in $NaNO_3$-NH_4Cl-NH_3-H_2O, Aug 252
Oxidation of single crystals under ionic bombardment, Aug 237
Polarization behavior, Feb 50
Zirconium, oxidation of, Nov 379
